

News Release

The Biglerville Borough Council and the Adams County Office of Planning and Development have announced that a survey of customers of the Biglerville Sewer and Water Company will be conducted soon as part of Biglerville Borough's application for Community Development Block Grant (CDBG) funding for sewer and water system improvements.

Part of the funding application process is to survey customers in order to provide current estimates of the income levels of residents in the system's service area. A sample of customers of the Biglerville Sewer and Water will receive a survey form by mail in May from Biglerville Borough. Each customer family will be asked to complete the survey form and return it in a stamped, self-addressed return envelope. Responses to the survey will be kept confidential and should take less than 5 minutes to complete.

To be eligible for the grant, Biglerville will need to collect responses from almost all of the customers who receive the survey. Therefore, we urge you to return your survey to us as quickly as possible.

Note that customers living in rental properties should complete this survey, not landlords. If you receive a survey but are a property owner who does not reside at this address, please provide this survey and return envelope to your tenants or contact us at 717 677 9488 to provide updated contact information. Any customer with questions about the survey, or who needs assistance in completing it, should contact Biglerville Borough, Sandi Vazquez, Secretary/Treasurer at 717 677 9488 or by email at biglerville@comcast.net.

Thank you to all of our customers in advance for providing this critical assistance.
